AI development in industry – lessons from SAP

PROGRAMM

Dr. Daniel Dahlmeier– Senior Director, SAP Artificial Intelligence

Title: *AI development in industry – lessons from SAP*

Abstract: In this talk, I will present some of the lessons learned concerning developing AI for industry applications. I will use examples from the SAP AI portfolio to highlight where corporate AI development resembles academic AI research, where it differs, and what suggestions we can draw from these observations when preparing the next generation of data scientist.

Bio: Daniel Dahlmeier is a Senior Director at the SAP AI team. Before joining SAP, he completed his Ph.D. in computer science and NLP at the National University of Singapore and his Diploma in computer science at the Karlsruhe Institute of Technology.
